The application has been amended as follows:

IN THE CLAIMS:

Claim 11, line 3, "FIR" has been replaced by --finite impulse response (FIR)--.

Claim 25, line 3, "FIR" has been replaced by --finite impulse response (FIR)--.

Claim 36 has been amended as follow:

--36. (Currently amended) The base station of claim 30, [wherein one of the peak detection and cancellation circuits comprises a cancellation pulse generator; and] wherein the <u>at least one</u> cancellation pulse generator comprises:

a look-up table memory for storing a plurality of <u>finite impulse response</u>
(FIR) [FIR] pulse coefficients;

computational circuitry, coupled to the look-up table memory and to a peak detector circuit, for producing a data stream corresponding to the combination of the FIR pulse coefficients with an offset corresponding to the peak location; and Application/Control Number: 10/643,179

gain scaling circuitry coupled to the computational circuitry, for scaling the data stream responsive to the filter value from a filter generator of the peak detector circuit.--

Claim 38, line 1, "each of" has been deleted; line 2, "plurality of" has been replaced by --at least one--; line 2, "generators" has been replaced by --generator--.
